

FlowPlumb Systems[®] Electric Water Heaters

Plumbing For Life

MADE IN ITALY

Featuring

Blue Forever 
Glasslined heating element

5 YEAR WARRANTY

THE FLOWPLUMB™ EXPERIENCE

Whether it's the pure pleasure of luxurious hot water cascading from a rain stream shower, or the convenience of instant hot water, FlowPlumb™ Water Heaters are crafted in Italy to the highest standards of performance. Our unique technology combines reliability & safety to produce a longer lasting, better performing Water Heater.

INSPIRED FROM WITHIN

'Blue Forever' is at the core of FlowPlumb™ Water Heater DNA. A new generation of ultra-strong heating elements, this patented technology is designed to:

reduce scaling • increase heating efficiency • greatly prolong the life of the heating element

Blue Forever heating elements are designed to outlast all known conventional elements and minimise maintenance. Your Blue Forever element is included in our 5 year warranty

REDEFINING PERFORMANCE

The inner surface of Flowplumb Systems™ water heaters is protected by “Blue Silicon” powder enamelling. This is applied using the most modern technologies for electrostatic application, and then vitrified at 850°C.

PROTECTING THE ENVIRONMENT

For insulation, a high performance water blown polyurethane is used resulting in maximum performance without CFC's or any other dangerous substances being released.

Laboratory tests are performed periodically to verify compliance to the declared performance data.

Furthermore, our Water Heaters have been conceived to be highly recyclable after their disposal.

With capacities ranging from 10 to 30 litres, Flowplumb Systems™ small capacity water heaters are an easy and ideal solution for low level requirements and can be installed in areas of limited space.

SMALL CAPACITY FEATURES & BENEFITS

Tank Capacity:	10 litre	15 litre	30 litre
Heating Time: (to 45°C)	22 mins	33 mins	1h 07 mins
